▶ Description

The reader starts at the triangular bump at the top, following the line of braille with the finger, this way and that. Here and there the line branches in two directions. When the braille stops, it is the signal to return and go in the other direction. The goal is the round bump at the bottom of the page. The 11 mazes begin with very simple patterns and single lines and gradually increase in complexity.

突起のある線を指でさわってたどっていく迷路が、11種類収められている。簡単なものから始まり、順々に難しいものにチャレンジできる。全盲の人、弱視の人、目の見える人、幼児から大人まで、みんなで遊べる美しい迷路絵本。
